Objective

Use my current programming experience to find a workplace that can provide me a chance to get hands on experience with web development.

Education

LaunchCode LC101 *(2017-2018)*

> LC101 is a 20 week course split into three units. I learned Python programming in the first unit. In the second unit, I worked with Python and Flask to make and work on basic web applications. In the third unit, I learned how to use Java and Spring MVC to make web applications superior and more advanced than my old python applications.

LaunchCode LiftOff *(2018)*

> LiftOff is a program by LaunchCode that teaches students how to work in a development team. It has helped prepare me for working within the established processes commonly found in programming teams.

Technical Skills

Moderate experience making web applications with **Java** and the **Spring Boot Framework**

Moderate experience creating and querying databases with **SQL** and moderate experience using **MySQL** to integrate databases into web applications.

Moderate experience with **HTML** and **CSS**

Basic experience making basic web applications with **Python** and **Flask**

Work Experience

St. Louis Bread Company Delivery Team Member

(October 2017 - Present)
